More seat choices, conditional exposure

Can people with different scent requirements move to another seat and rejoin a shared activity?

Curved room B / saved return snapshot, frame 836

F1b chair pulled 300 mm; N1 chair 20 mm forward / 20 mm left.

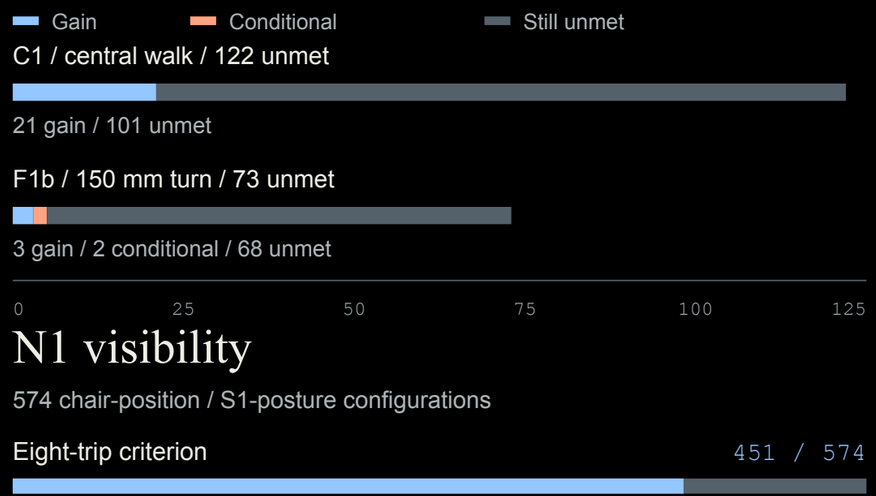

Final mark: 556 mm forward / 30.0 mm right. Both native rooms retained.

Small shortcuts, no further gains.

Largest tested shortcut (169 inputs): 11.8 mm saved; 0 of five F1b profiles pass, with 353–471 mm still needed. Keep the final route. Profile gains use the original rules; moving exposure has not rescored them. Visibility is geometric.

More qualifying choices

Final route-stage gains / 7,490 virtual profiles per origin

N1 visibility

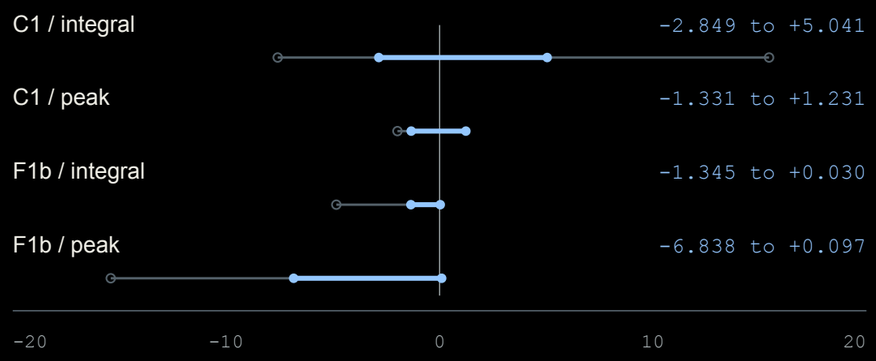

574 chair-position / S1-posture configurations

369 is within 451. 123 fail; another 82 miss frame 804.

Journey exposure is conditional

Simulated final vs old / % / V107 primary panel

Blue: non-Dlow (20,160 pairs); grey: Dlow extension.
C1 integral: origin 5,956/6,048 higher; destination all lower.
Dlow: small old baselines; strict archive match failed.
Full panel: 24,192 pairs / baseline clock / 42 phases.
