Chair floor-reference template / 1:1

A0 portrait / 841 x 1189 mm / Print 100% actual size / Fit and shrink OFF

Chair A = T2/S4 | Chair B = T6/S3 | Same chair geometry in B'72 and B72.

Bold: two sled rails, each 25 x 455 mm; rail centre spacing 395 mm. Thin: other projected chair parts.

Black = rest. Dashed blue = 300 mm backwards reference. Orient to each chair facing angle on A3 sheet 4.

Actual furniture must remain stably floor-supported. Model Z20 is not a support or fabrication instruction.

Measure both 100 mm bars and a 455 mm bold rail. If tiled, check the assembled template in both directions.

Use reference marks to observe actual pulls; do not force the mover to match 300 mm.
